

GUARANTEED ANALYSIS

Total Organic Matter	: 15 % (w/v)
Organic Carbon (C)	: 6 % (w/v)
Organic Nitrogen (N)	: 1 % (w/v)
Free Amino Acid	: 10 % (w/v)
Water Soluble Potassium Oxide (K ₂ O)	: 3 % (w/v)
Water Soluble Iron (Fe)	: 0,03 % (w/v)
Water Soluble Manganese (Mn)	: 0,02% (w/v)
Water Soluble Molybdenum (Mo)	: 0,02 % (w/v)
Water Soluble Zinc (Zn)	: 0,05 % (w/v)

CE-FORCE

BENEFITS

CE-FORCE AMINO provides the maximum amount of free L-α-amino acids of vegetal origin. L configuration facilitates the rapid recovery of the plant after critical or stress situations, as it does not have to use extra amounts in amino acid synthesis.

CE-FORCE AMINO is a fertiliser that is rapidly absorbed and immediately metabolized, which stimulates shooting, vegetative growth, fruit fattening, vegetal tissue regeneration, etc. In short, with CE-FORCE AMINO, the final result is a prime-quality product.

PACKAGING:

LIQUID Organic Fertiliser With Plant Originated Amino Acid

AMINO

Biostimulants - Amino Acids Plant Growth Regulators

FEATURES

CE-FORCE AMINO is an organic biostimulator containing 10% amino acids, peptides and several micronutrients (Fe, Zn, Mn and Mo). Through quick absorbance by leaves and transfer to the plant tissues, CE-FORCE AMINO acts as natural bio-stimulants and organic chelate ligands for micronutrients. They also support plant recovery during abiotic or biotic stress, and they provide the plant with the most important micronutrients.

USAGE AREA, FORM, TIME AND QUANTITY

USAGE AREA	APPLICATION TIME	SOIL APPLICATION	FOLIAR APPLICATION
Citrus	During the shoot period and pre-flowering.	15 - 20 Lt. / Ha	250 mL / 100 Lt. Water
All Pome Fruit Trees	When the fruits reach the size of a walnut and during the summer shoot.	15 - 20 Lt. / Ha	200 mL / 100 Lt. Water
All Stone Fruit Trees	In every period needed after flowering.	15 - 20 Lt. / Ha	200 mL / 100 Lt. Water
Vineyard	In every period needed before and after flowering.	15 - 20 Lt. / Ha	200 mL / 100 Lt. Water
Corn	When the plant is 40 to 50 cm in height	15 - 20 Lt. / Ha	300 mL / 100 Lt. Water
Cotton	Before cotton first square - bud and after cotton boll open.	15 - 20 Lt. / Ha	300 mL / 100 Lt. Water
All Tuberous Plants	5 - 7 leaf stage and repeat 20 days after.	15 - 20 Lt. / Ha	200 mL / 100 Lt. Water

MIXABILITY

It is recommended to conduct small container compatibility tests before mixing with the other products. To be used only if required, and do not exceed the recommended dosages.
