

TECHNICAL DATA SHEET

CE-FORCE BORON

Product	CE-FORCE BORON
Document type	TDS
Category	Liquid boron ethanolamine fertiliser
Document code	CEON-CE_FORCE_BORON-TDS-REV04
Revision / Issue	04 / 17 July 2026

1. Product description

A concentrated foliar and soil-applied boron fertiliser designed to correct or prevent boron deficiency and support flowering, pollen viability, fertilisation and fruit set.

2. Guaranteed analysis

Guaranteed parameter	Declared content
Water-soluble Boron (B)	8.0% w/v

3. Key agronomic benefits

- Supports pollen germination and fertilisation
- Promotes uniform flowering and fruit set
- Helps maintain cell-wall formation and sugar transport
- Suitable for foliar and fertigation programmes

4. Recommended use

Soil/fertigation reference rate: 2.0-3.0 L/ha. Foliar reference rate: 250-300 mL/100 L water. Apply according to crop requirement, nutrient analysis, local registration and professional agronomic advice. Do not exceed the label rate.

5. Compatibility and mixing

Before tank mixing, conduct a small-scale jar test. Add to a partially filled tank under agitation. Avoid mixing concentrates directly. Check water quality and local compatibility guidance.

6. Physical and handling characteristics

Form	Liquid concentrate
Colour / odour	Product-specific; verify against approved batch specification
Solubility	Designed for dilution in water
Packaging	1 L, 5 L, 10 L, 20 L and other approved commercial packs

7. Storage and shelf-life

Store tightly closed in the original container, in a cool, dry and ventilated area, protected from direct sunlight, frost, heat and incompatible materials. Shelf-life must follow the approved batch and label documentation.

8. Regulatory note

This TDS is based on the CEON catalogue declaration. Final label, classification, permitted claims and application rates must comply with the law of the country of sale.
