

GUARANTEED ANALYSIS

Total Organic Matter	:20 % (w/v)
Total Nitrogen (N)	: 6 % (w/v)
Urea Nitrogen (NH2-N)	: 6 % (w/v)
Water Soluble Phosphorus PentaOxide(P2O5)	: 6 % (w/v)
Water Soluble Iron (Fe)	: 0,3 % (w/v)
Water Soluble Zinc (Zn)	: 0,5 % (w/v)
Free Amino Acid	: 2,5 % (w/v)

BENEFITS

REFLEX is a special product rich in amino acids derived from wet plants. In perennial plants it is suitable to use with plant sap water movement. It can be used safely from the seedling planting period in annual plants, or from when 3-5 leaves appear on the plant.

REFLEX stimulates the growth tip of the plant due to its special content.

REFLEX increases over ground plant organ activity and re-sprouting and also encourages flowering at the same time.

REFLEX increases the resistance of plants against adverse environmental conditions (Soil salinity, Heat, Cold, Water stress, etc.).

REFLEX increases the fruit set when used before flowering. When used during fruit development, it increases the fruit size and quality.

REFLEX increases the storage, quality and shelf life of the fruit.

REFLEX is used safely in combination with phytosanitary products, fertilisers and plant growth regulators.

REFLEX, with its optimally balanced formulation, it is an indispensable product against growth and color problems in fruit.

REFLEX promotes root development and increases fruit formation.

REFLEX increases fruit growth in cold periods, and prevents choking, especially in pepper.

REFLEX increases flower formation with its phosphor content.

REFLEX helps facilitate the ripening process of plants.

REFLEX increases the market value of the crops.

Liquid Organomineral Fertiliser With Nitrogen And Phosphorus

REFLEX

FEATURES

REFLEX is a special organomineral fertiliser designed to satisfy organic material needs of the plant and soil, as well as supplying the necessary macro and micro elements. Its organomineral compound content is effective in promoting plant growth, increasing resistance against environmental conditions like heat and cold, and increasing produce yield. It can be used on many vegetables and fruits in greenhouses and open field cultivation.

In addition, the high level and easily absorbable free acid content of REFLEX provides a noticeable difference in plant growth, fruit ripening and fruit yield.

REFLEX can be applied both in drip irrigation and foliar application.

USAGE AREA, FORM, TIME AND QUANTITY

USAGE AREA	APPLICATION TIME	SOIL APPLICATION	FOLIAR APPLICATION
All Greenhouses and All Open Field and Winter Vegetables	1 - 2 applications with drip irrigation 10 days after planting. From pre-flowering until the harvest, it can be applied with foliar application at regular intervals.	20 Lt. / Ha	250 - 300 cc. / 100 Lt. Water
Strawberry and Ornamental Plants	Begins with vegetative growth and apply at 10 - 15 day intervals throughout the season.	20 Lt. / Ha	250 - 300 cc. / 100 Lt. Water
Vineyard	From the beginning of the shoot until the harvesting period, it can be applied by drip irrigation when needed. It can also be applied by foliar application at regular intervals until fruit set period.	20 Lt. / Ha	250 - 300 cc. / 100 Lt. Water
Corn and Sunflower	Every 7 - 10 days from bud break to bloom. Use while Nitrogen fertilization is necessary.	20 Lt. / Ha	250 - 300 cc. / 100 Lt. Water
Cereals and Forage Crops	During the tillering period in early spring.	20 Lt. / Ha	300 - 350 cc. / 100 Lt. Water
All Stone and Pome Fruit Trees and Nut Crops	From beginning of blooming until the harvesting, it can be applied at regular intervals.	20 Lt. / Ha	150 - 200 cc. / 100 Lt. Water
Cotton	It can be used safely in every period needed from when 8 - 10 leaves appear.	25 Lt. / Ha	500 cc. / 100 Lt. Water

MIXABILITY

It is recommended to conduct small container compatibility tests before mixing with the other products. To be used only if required, and do not exceed the recommended dosages.
