

TECHNICAL DATA SHEET

CE-FORCE NICKEL

Product	CE-FORCE NICKEL
Document type	TDS
Category	Liquid nickel and sulphur micronutrient fertiliser
Document code	CEON-CE_FORCE_NICKEL-TDS-REV04
Revision / Issue	04 / 17 July 2026

1. Product description

A nickel-containing micronutrient fertiliser developed for crops requiring nickel support, particularly legumes and crops where urease activity and nitrogen metabolism are important.

2. Guaranteed analysis

Guaranteed parameter	Declared content
Nickel (Ni)	10.0% w/v
Sulphur (S)	6.0% w/v

3. Key agronomic benefits

- Supports urease activity and nitrogen metabolism
- Helps reduce the risk of urea-related toxicity
- Supports lignin formation and plant strength
- Particularly relevant to legume nutrition

4. Recommended use

Soil/fertigation reference rate: 1.5-2.0 L/ha. Foliar reference rate: 100-150 mL/100 L water. Apply according to crop requirement, nutrient analysis, local registration and professional agronomic advice. Do not exceed the label rate.

5. Compatibility and mixing

Before tank mixing, conduct a small-scale jar test. Add to a partially filled tank under agitation. Avoid mixing concentrates directly. Check water quality and local compatibility guidance.

6. Physical and handling characteristics

Form	Liquid concentrate
Colour / odour	Product-specific; verify against approved batch specification
Solubility	Designed for dilution in water
Packaging	1 L, 5 L, 10 L, 20 L and other approved commercial packs

7. Storage and shelf-life

Store tightly closed in the original container, in a cool, dry and ventilated area, protected from direct sunlight, frost, heat and incompatible materials. Shelf-life must follow the approved batch and label documentation.

8. Regulatory note

This TDS is based on the CEON catalogue declaration. Final label, classification, permitted claims and application rates must comply with the law of the country of sale.
