| Manufacturing date   | _____ |
| Expiry date          | _____ |
| Sample date          | _____ |
| Laboratory reference | _____ |

### Analytical specification and batch results

| Parameter                    | Specification | Batch result                  | Method                              |
|------------------------------|---------------|-------------------------------|-------------------------------------|
| Water-soluble Manganese (Mn) | 4.0% w/v      | To be entered from batch test | ICP-OES / validated in-house method |
| Water-soluble Zinc (Zn)      | 5.0% w/v      | To be entered from batch test | ICP-OES / validated in-house method |

### Physical checks

|             |                                            |               |
|-------------|--------------------------------------------|---------------|
| Appearance  | Product-specific liquid                    | To be entered |
| Homogeneity | Uniform; free from unacceptable separation | To be entered |
| pH          | Approved batch specification               | To be entered |
| Density     | Approved batch specification               | To be entered |

### Release statement

This template must be completed only from the actual laboratory record for the identified batch. Blank fields are intentional. Do not publish or sign as a batch certificate until the results have been reviewed and approved by authorised Quality Control personnel.
