### Analytical specification and batch results

| Parameter                               | Specification | Batch result                  | Method                              |
|-----------------------------------------|---------------|-------------------------------|-------------------------------------|
| Water-soluble Copper (Cu)               | 5.0% w/v      | To be entered from batch test | ICP-OES / validated in-house method |
| Water-soluble Phosphorus (as phosphite) | 15.0% w/v     | To be entered from batch test | Validated in-house method           |

### Physical checks

|             |                                            |               |
|-------------|--------------------------------------------|---------------|
| Appearance  | Product-specific liquid                    | To be entered |
| Homogeneity | Uniform; free from unacceptable separation | To be entered |
| pH          | Approved batch specification               | To be entered |
| Density     | Approved batch specification               | To be entered |

### Release statement

This template must be completed only from the actual laboratory record for the identified batch. Blank fields are intentional. Do not publish or sign as a batch certificate until the results have been reviewed and approved by authorised Quality Control personnel.
